PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience specializing in Generative AI, LLM-based Retrieval-Augmented Generation (RAG), and scalable backend/full-stack applications using Python, Azure OpenAI, and Qdrant. Skilled in document ingestion, vector embeddings, hybrid search, ColBERT reranking, AI-agent workflows, and automated summarization. Experienced in developing secure REST APIs and deploying enterprise AI applications.

PROFESSIONAL EXPERIENCE

Software Engineer February 2023 – Present
Global Automation India Pvt. Ltd. *Bengaluru, Karnataka*

- Developed enterprise GenAI and RAG applications using Python, Azure OpenAI, Qdrant, and React to support intelligent document retrieval and workflow automation.
- Designed secure REST APIs, authentication mechanisms, and deployment workflows for production full-stack applications.

Key Projects:

- **Navigator – AI-Powered Mentoring Platform (Ongoing):** Building an AI-powered mentoring platform using Python, OpenAI, Qdrant, and React to generate assessments tailored to coachee requirements. Implemented AI-agent workflows for assessment generation, along with map management, assignment scheduling, and progress tracking.
- **Podcast Search Application:** Built an AI-powered podcast search platform using Python, Azure OpenAI, Qdrant, and RAG, processing approximately 2,000–2,200 podcast episodes. Automated RSS/YouTube ingestion, transcription, chunking, and indexing. Implemented hybrid retrieval combining dense embeddings and BM25 with ColBERT reranking to improve search relevance, alongside LLM-based summarization.
- **Powerguide RAG Application:** Designed and developed an enterprise RAG platform using Python, Quart, Azure OpenAI, and Qdrant. Implemented document ingestion, chunking, embeddings, vector retrieval, automated summarization, and citation-backed responses across 5,000+ documents, reducing information retrieval time from approximately 15 minutes to 1 minute.

AWARDS & ACHIEVEMENTS

- **Global One Person Army Award (2026)**
  Recognized for exceptional ownership, domain mastery, and independent end-to-end delivery of enterprise GenAI applications.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University 2018 – 2022
B.Tech in Computer Science – CGPA: 7.37 *Lucknow, U.P.*

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, TypeScript
- **Generative AI & LLMs:** LLMs, RAG, Prompt Engineering, Embeddings, Vector Search, Semantic Search, Hybrid Retrieval, BM25, ColBERT, AI-Agent
- **Backend:** Quart, REST APIs, JWT Authentication
- **Frontend:** React, HTML5, CSS3, Tailwind CSS
- **Databases:** Qdrant, MySQL, PostgreSQL
- **DevOps & Tools:** Git, GitHub, Apache Tomcat, Microsoft Azure

ACADEMIC PROJECTS

- **Hostel Management System:** February 2022 – April 2022
  Built a web application for room allocation, mess services, and student records using PHP, HTML, CSS, and JavaScript.
- **Doctor Desk:** August 2021 – January 2022
  Developed a patient management application using Flask (Python) and MySQL for diagnostic records, examinations, and prescriptions.

CERTIFICATIONS

- **Advanced Java**, Naresh i Technologies February 2022 – April 2022
- **Basics of Geo-computation and Geo-web Services**, ISRO October 2021 – November 2021
- **Data Science Math Skills**, Coursera July 2020 – August 2020
